

General Terms and Conditions for R&D Projects

The General Terms and Conditions for R&D Projects constitute an integral part of all R&D project contracts with the Research Council of Norway and apply unless otherwise agreed in writing.

The following general terms and conditions apply to all applications received by the Research Council of Norway as from 1 March 2025.

1 Key terms

Project administrator: The individual who is authorised to represent and assume obligations on behalf of the Project Owner in respect of the Research Council. If the Project Owner has designated a specific contract administrator, then this individual will assume the role of the project administrator with regard to authorisation to accept and/or amend the agreement documents for all R&D projects which the Project Owner has established with the Research Council of Norway.

Agreement document: The document that is signed by the parties and that contains the agreed-upon specifications and stipulations for the project.

Allocation: The Research Council's approved funding of a project, which is binding for one budget year at a time.

Direct costs: Costs that are directly attributable to the implementation of the project.

Effective collaboration: Collaboration between at least two independent parties to exchange knowledge or technology, or to achieve a common objective based on the division of labour, where the parties jointly define the scope of the collaborative project, contribute to its implementation and share its risks, as well as its results. One or several parties may bear the full costs relating to the project and thus relieve other parties of its financial risks. Contract research and provision of research services are not considered forms of collaboration.

Funding plan: A plan indicating how the project costs will be financed throughout the project period. Force majeure: Unforeseeable or exceptional circumstances beyond a party's control.

The following general terms and conditions apply to all applications received by the Research Council of Norway as from 1 March 2025.

Research-generated data: Registered records, notes and reported information in the form of numbers, text, visual and audio files that are generated by or emerge in the course of the research project.

Research infrastructure: Facilities, resources and related services that are used by the scientific community to conduct research in their respective fields and covers scientific equipment or sets of instruments, knowledge-based resources such as collections, archives or structured scientific information, enabling information and communication technology-based infrastructures such as grids, computing, software and communication, or any other entity of a unique nature essential to conduct research.

Such infrastructures may be 'single-sited' or distributed' (an organised network of resources).
R&D: Research and development.

R&D provider: An entity that, pursuant to the agreement document, will deliver R&D work on assignment for the Project Owner and/or any partners.

Progress plan: Plan for the performance of the project's activities, including secondary objectives and milestones.

Intellectual property rights: Patents and all other rights to technical solutions, methods, processes, procedures, drawings, prototypes, specifications, design, circuit layout drawings and trade secrets, regardless of whether or not these are or may be patented or registered as well as all copyrights, database rights and other similar rights, rights to trademarks, domains, and other distinguishing business identification marks, and rights protected under the Act relating to the control of marketing and contract terms and conditions, etc. (Marketing Control Act), regardless of whether these are or may be registered.

Indirect costs: Costs that are associated with the project's proportional use of resources that are not directly attributable to the implementation of the project.

Commercial utilisation: Direct or indirect use of project results in the development and/or marketing of products, services or processes, or the transfer and/or licensing of use of project results to third parties. Publication through publishing houses is not defined as commercial utilisation.

Contract: The R&D Project Agreement Document, the project description and the General Terms and Conditions for R&D Projects, as well as any specified supplementary documents.

Contract administrator: A designated individual who is authorised to accept and/or amend the agreement document for all R&D projects which the Project Owner has established with the Research Council.

Cost plan: A list of the overall budgeted project costs for the project period distributed by cost category.

Party/Parties: The Project Owner and the Research Council, individually or together.
Project: The overall activities covered by the contract.

Project Owner: The entity that is responsible vis-à-vis the Research Council for ensuring that the project is carried out in accordance with the contract, receives the Research

Council's allocation on behalf of itself or any partners, and that is otherwise obligated under the contract.

Background: The knowledge, including intellectual property rights, that the Project Owner and partners bring into the project.

Project description: Scientific and administrative description of and plan for the implementation of the project.

Project funding: Resources that are made available to cover the project costs.

Project costs: Direct and indirect costs associated with the implementation of a project.

Project manager: The individual who is in charge of the progress and performance of the project on behalf of the Project Owner.

Project partner: Project Owner, partner and R&D provider.

Project period: The time span during which the project is to be performed, as specified in the agreement document.

Project accounts: Accounts detailing the project costs and project funding.

Project results: All results produced or achieved in connection with the project, including intellectual property rights, regardless of whether or not the results are protected by law.

Project summary: Short scientific description of the project that may be made available to the public.

Collaboration agreement: Agreement regulating among other things the approach, distribution of tasks and rights and obligations between the Project Owner and the partners.

Partners: The entities that, in accordance with the agreement document, are to perform the project in effective collaboration with the Project Owner and, if relevant, other partners.

Sign/signing: Electronic acceptance of the contract on 'My RCN Web' in the Research Council's online application administration system and/or the physical signature on the agreement document.

Pledge: A conditional promise of funding from the Research Council to the project.

Sub-contractor: An actor who supplies goods and/or provides services to the project on assignment from the Project Owner and/or any partners, and who is not a partner or an R&D provider.

2 The project

2.1 Project implementation

The project shall be carried out in accordance with the call and the contract.

The Project Owner is required to comply with the applicable statutory framework and other public regulations, ethical guidelines as well as recognised quality standards and norms for good research practice.

2.2 R&D providers

The Project Owner and/or partners can enter into agreements with R&D providers in accordance with the framework that follows from the contract.

The use of R&D providers does not exempt the Project Owner from its obligations and liability pursuant to the call and the contract.

The Project Owner is required to ensure that R&D providers comply with the rights and obligations that follow from the contract.

Any changes in the composition of R&D providers as outlined in the agreement document will require the prior written approval of the Research Council.

The Project Owner is obliged to ensure that the R&D providers deliver their services on terms and conditions that ensure that the Project Owner and partners do not receive indirect state aid from the R&D provider, in accordance with the EFTA Surveillance Authority's guidelines on state aid for research and development and innovation.

2.3 Subcontractors

The Project Owner and/or any partners can enter into agreements with subcontractors in accordance with the framework that follows from the contract.

The use of R&D providers does not exempt the Project Owner from its obligations and liability pursuant to the contract.

Subcontractors may not be granted any rights to project results.

The Project Owner is required to ensure that subcontractors comply with the rights and obligations that follow from the contract.

3 Projects in collaboration with partners

In projects carried out in collaboration with partners, the Project Owner shall represent the partners vis-à-vis the Research Council.

The Project Owner is required to sign a collaboration agreement with the partners. Unless otherwise agreed in writing, The Research Council must have received the signed collaboration agreement within three months after the Research Council has sent the contract to the Project Owner, and the collaboration agreement must be received before the Research Council will disburse any funds. If the collaboration agreement has not been received within the deadline, the grant will cease.

The collaboration agreement is to govern the reciprocal rights and obligations of the Project Owner and respective partners, including distribution of project costs, ownership of research infrastructure and rights, etc., pertaining to research results, cf. Section 9.

The Project Owner is required to ensure that the collaboration agreement reflects the terms and conditions of the contract between the Project Owner and the Research Council, including that the partners are bound by the same obligations as the Project Owner in so far as this is relevant for the partner's role in the project, and that the partners at all times are informed about relevant elements of the contract. The partners must through the collaboration agreement accept the same terms and conditions as laid down in the contract including provisions on confidentiality, control and auditing, etc.

The Project Owner must, among other things, ensure that the allocation is used in accordance with the call and the contract, and that the partners that receive funding keep and submit cost accounts to the Project Owner as a basis for the preparation of project accounts that meet the requirements set out in the contract, cf. Section 6.

Collaboration shall take place on terms and conditions that ensure that neither the Project Owner nor the partners receive indirect state aid, in accordance with the EFTA Surveillance Authority's guidelines on state aid for research and development and innovation.

The Research Council may stipulate special requirements pertaining to collaboration between partners.

The signing of the collaboration agreement in no way changes the Project Owner's responsibility pursuant to the contract.

Any changes in the composition of the partners as outlined in the agreement document will require the prior written approval of the Research Council.

4 Disbursement, transfers and reservations

4.1 Disbursement

Funding will not be disbursed until the contract has been signed by both parties and received by the Research Council along with copies of any collaboration agreements, and information about the Project Owner's bank account number has been conveyed to the Research Council in the manner specified. Payment is made to the project manager's bank account when this can be confirmed in the banks' joint account and address register - KAR. The project manager must ensure that he has a bank account registered under his organization number.

Unless otherwise agreed in writing, the funds are paid in arrears based on submitted EHF invoice that will document the costs of the project.

The Research Council will not disburse the final payment until the final report and/or annual accounting report has been submitted and approved, cf. Section 7.3

4.2 Termination of disbursement

The Research Council can stop any further payments if the Research Council finds that the implementation of the project deviates from the contract, or if other circumstances so indicate, cf. Section 4.7.

4.3 Transfer of unused funds from a fiscal year

On the basis of a request from the Project Owner citing reasons why it is justified, the Research

Council may consent to the carrying forward of unused funding from one fiscal year to the next. The Project Owner must submit such an application for transfer to the Research Council no later than the deadline specified by the Research Council.

In the event consent is not given for the unused funding to be carried forward, this amount will be deducted from the total allocated sum. If the funding has already been disbursed, the Research Council may reduce the following year's disbursement by a corresponding amount or require reimbursement of the unused funds.

4.4 Reduced payment and reimbursement of unused funds due to lower project costs

If the project costs are lower than the amounts indicated in the cost plan, then any remaining undisbursed funds will not be paid out. Disbursed funding in excess of the Research Council's agreed proportion of the project costs shall be repaid to the Research Council in the manner that it specifies.

4.5 Reimbursement as a result of incorrect disbursement

If the Research Council has disbursed a higher amount than what follows from the allocation, the Project Owner shall repay the difference immediately. Unless the incorrect disbursement is due to conditions on the part of the Research Council, interest accrues in accordance with the Act relating to Interest on Overdue Payments etc. (LOV-1976-12-17-100) from the date on which the Project Owner received the funds.

4.6 Offsetting

The Research Council may recover overpayment of funding by offsetting the amount against remaining payments or other claims that the Project Owner may have vis-à-vis the Research Council, including undisbursed funding in other projects. This applies regardless of the date on which the claim arose or fell due.

4.7 Reservations

Allocations are made for one fiscal year at a time. Any pledges for subsequent years are not binding on the Research Council unless specifically stated in the agreement document.

Disbursement of the grant for Year 1 and honouring of any pledges for subsequent years are contingent on there being no changes in public regulations (rules, standards, legislation, etc.), and that no other unforeseen circumstances have arisen that will have a major impact on the implementation of the project, or the Research Council's ability to contribute to it.

The Research Council will honour its pledge for subsequent years contingent on the following stipulations, among others:

- That no deviations from the contract and/or breach of contract have occurred

- The Research Council receives the progress report for the project and approves any requests to change the approved project framework, cf. Section 7.2.

In the event one or more of these conditions is not satisfied, the Research Council may stop or change any future allocations or pledges. Furthermore, the Research Council may require repayment of all or part of the disbursed allocation, or decide to cancel the contract pursuant to Section 18, if this is warranted under the circumstances.

5 Eligible project costs

Only direct and indirect costs that are necessary to the implementation of the project and that are included in the cost plan may be charged to the project.

6 Accounting

The Project Owner is to keep a separate project account specifying project funding and project costs.

Project funding and project costs must appear in the Project Owner's formal accounts. The accounts shall be kept current. Under all circumstances, information of significance to the preparation of compulsory reports stipulated in the contract must be recorded within the deadlines that apply to such reporting. Project accounts must satisfy the requirements set out by the Research Council in its relevant guidelines, and must be in accordance with good accounting practice and commonly accepted accounting principles.

Research organisations and others engaged in both economic and non-economic activity, must clearly separate the two kinds of activities and their costs, funding and revenues so that cross-subsidisation of the economic activity is effectively avoided.

7 Reports

7.1 In general

The Project Owner is required to prepare and submit reports within the stipulated deadlines, in the manner and format specified by the Research Council. The information shall be up-to-date and meet the Research Council's guidelines applicable at all times.

All changes and deviations to the project and the contract shall be reported to the Research Council unsolicited and without undue delay in the format specified by the Research Council.

The Project Owner shall store the final report and project data in a safe and secure manner for at least 10 years after the conclusion of the contract period.

7.2 Progress reports and notifications of changes to the project framework

In the progress report, the Project Owner is to provide information regarding the project results achieved.

The progress report must be received and any requests for changes to the project framework must be approved by the Research Council before the allocation can be disbursed and/or funding pledges will be honoured, cf. Section 4.7.

7.3 Final reports

Unless otherwise agreed in writing, the Project Owner is to submit the final report to the Research Council by at the latest one month after the conclusion of the project period or any other date specified by the Research Council.

The Project Owner is to provide the name of the archives or data infrastructure to be used for storing the research data/output data generated in connection with the project that may be relevant for reuse, and all the necessary documentation for reuse of the data (metadata).

Projects that have submitted a data management plan must append the latest version of this plan to the final report.

The final report must be approved by the Research Council.

7.4 Other reports

Within reason, the Research Council is entitled to request additional reports covering shorter periods of time or specific parts of a project.

For certain types of projects, the Research Council requires the submission of an annual project account report. This will in such case be specified in the agreement document.

Upon the request of the Research Council, and to the degree possible, the Project Owner and partners are required to contribute at no charge to the Research Council's evaluation of the project and measurement of results. This evaluation includes an assessment of the scientific and economic significance of the project's results. Unless otherwise agreed in writing, the Project Owner will be under obligation to contribute in this way for a period of up to 10 years from submission of the final report.

The Project Owner is also required to submit account information and any other statistical data relating to the project to the national research statistics authorities.

8 Employer responsibility

The Project Owner has employer responsibility for all its own staff members who are affiliated with the project.

9 Right of ownership, utilisation rights and licensing

9.1 Research infrastructure

The Project Owner has ownership of research infrastructure purchased with project funds in projects without partners. In projects involving collaboration with partners, the ownership of the research infrastructure shall be regulated in the collaboration agreement, cf. Sections 3 and 9.3.

The Project Owner and, if relevant, any partners with ownership rights to the infrastructure, is required to ensure that the research infrastructure is adequately insured and kept operational and in good working order during the contract period.

9.2 Project results

9.2.1 Rights

The Project Owner and any partners must obtain the rights to commercial utilisation of the project results, and are required when necessary to sign agreements with owners, employees (including individuals with multiple employers), subcontractors and others to achieve this.

The obtainment of such rights is not intended to limit the protection accorded the rights holder's moral rights pursuant to the Norwegian Copyright Act, nor does it preclude agreements regarding remuneration schemes for rights holders corresponding to those that apply to employees' patentable inventions pursuant to the Act respecting the right to employees' inventions.

The Project Owner shall ensure open access to scientific publications relating to the project results, including that the Project Owner, partners and/or authors shall retain sufficient intellectual property rights to meet the open access requirements, which are described in more detail in Section 10. Among other things, this means that the Project Owner, partners and/or authors shall retain the unconditional right to make the final version of a manuscript following a peer review (AAM) and/or the publisher's published version (VoR) of a scientific article available under an open licence through an open archive, immediately on publication by the publisher.

9.2.2 Protection

The Project Owner and any partners must assess the need to protect project results that may have commercial value and, when so indicated, take suitable protective action. Where legislation requires that rights must be registered to obtain protection, such registration shall be carried out.

9.2.3 Utilisation

The project results must be utilised within a reasonable period of time, given the characteristics of the particular industry or market, the specific field of research, and the

relevant product's development time-frame, useful economic life and utilisation opportunities. If the party holding the rights to the project results does not achieve such utilisation, the persons who have produced the project results may demand that the rights are transferred to them, unless a different agreement is in place between

the Project Owner and those same persons, or between the various parties involved in projects in collaboration with partners, cf. Sections 3 and 9.3. This does not apply, however, in cases where:

- measures to achieve utilisation have been launched and are underway; or
- the rights holder's lack of utilisation of a project result is of commercial significance for the utilisation of the rights holder's other project results

9.2.4 Transfer of project results to a foreign legal entity

The transfer of ownership and/or licensing of exclusive rights to project results to a third party who is not a partner, and who is in a country outside the European Economic Area, may not take place without the written approval of the Research Council. The Research Council may refuse to grant approval for example if the transfer/licensing is considered to be in conflict with national economic interests, ethical principles, considerations relating to the safety of the realm or research security. Alternatively, the Research Council may stipulate conditions for the proposed transfers/licensing agreements. A request may be considered approved if the Research Council has not responded within four weeks of receipt of written notification. This provision applies for the duration of the project period and for three years after the project has been concluded.

9.2.5 Changes in ownership – foreign owners

The Research Council shall be notified immediately and in writing if a person or an undertaking outside the European Economic Area assumes a controlling interest in the Project Owner through the acquisition of a stake in the enterprise (shares, etc.), by agreement or by other means. The Project Owner is also required to notify the Research Council immediately and in writing if a person or an undertaking outside the European Economic Area assumes a controlling interest over any of the partners after a contract has been signed.

If the changes in ownership entail that the project results may be used in conflict with national economic interests, ethical principles, considerations relating to the safety of the realm or research security, the Research Council is entitled to impose conditions on the project and project results, including that the Project Owner shall wholly or partially transfer the project results exclusively to the Research Council. The Research Council may also cancel the agreement document and require reimbursement for disbursed allocations pursuant to Section 17 and 18. This provision applies for the duration of the project period and for three years after the project has been concluded.

9.3 Supplementary provisions for projects in collaboration with partners

The collaboration agreement between the parties, cf. Section 3, is to regulate ownership of infrastructure, and the rights to, protection of and use of project results, as well as use of,

and any compensation for, the background and any research infrastructure brought into the project.

The following principles are to be adhered to:

- For the duration of the project period, the Project Owner and partners must have the right to use, at no charge, all project results that are necessary for implementing their own work in the project.
- The Project Owner and partners must have the right to use project results and background brought in according to the agreed-upon terms, when this is necessary for commercial utilisation of the project results to which they themselves have rights under the project.

10 Publication and archiving

10.1 Publication of project results

Unless otherwise stipulated below, the Project Owner is required to make the project results public as quickly as possible. This includes ensuring that the dissemination measures and plans specified in the contract are implemented.

If publication of project results will interfere with the protection or commercial utilisation of the project results, the publication may be temporarily postponed until such protection or commercial utilisation has been achieved.

In special cases, the Research Council may give its written consent to the imposition of permanent secrecy on the project results. For projects with participants from the university and university college sector, permanent restrictions on the right to publish results cannot be agreed or determined beyond what is stipulated in or authorized by law.

Research-generated data must be made publicly available after the conclusion of the project, unless special circumstances indicate otherwise, or unless this is prevented by the terms and conditions of the contract or other public rules.

The Project Owner shall ensure that all scientific publications about or based on project results that are written by authors affiliated to the Project Owner or the partners, are published in accordance with the Research Council's requirements for such publications at all times, available at [Open access to publications](#). Among other things, this means that scientific articles shall be made immediately available online with open access under a Creative Commons Navngivelse CC BY 4.0 licence unless otherwise agreed with the Research Council.

10.2 Archiving of project results

The Project Owner shall ensure that all research-generated data, including all data that forms the basis for publications, is stored in a secure digital archive. Such archiving is to be carried out as soon as possible and at the latest two years following the conclusion of the project period. The Research Council may require that all such data, including the necessary documentation for reuse of data (metadata), is stored in designated, secure national or

international archives, unless there are special reasons for otherwise, or contractual terms or public regulations prevent it.

The Project Owner is under obligation to ensure that a copy of peer-reviewed scientific publications based on research that is wholly or partially funded by the Research Council is stored in appropriate, open-access archives immediately on publication by the publisher. The archived version shall be the last version of the manuscript following peer review (AAM) and/or the publisher's published version (VoR).

10.3 Publication of project information

The Project Owner and any partners are required to make reference to the Research Council's support in any external information issued about the project.

The Research Council has the right to publish the name of the Project Owner and project manager, partners, the project title, the duration of the project, the project summary, the popular science presentation and the amount of its allocation.

The Research Council may publish project results that are reported in connection with the progress and final reports unless the information has been designated as confidential.

Within reason, the Research Council is entitled to require that the Project Owner establishes a website for the project and takes part in relevant seminars, conferences and other dissemination and networking measures.

11 Confidentiality

The Research Council is required to comply with the Freedom of Information Act of 19 May 2006 No. 16 and the provisions relating to duty of secrecy under the Public Administration Act of 10 February 1967.

12 Transfer

The Project Owner may not transfer, mortgage or in any other way convey the use of the contract, or portions of the contract, including allocations and pledges from the Research Council, without the prior written consent of the Research Council.

13 Indemnification and discharge of liability

The Project Owner bears liability for ensuring that the performance of the project does not violate the rights of any third parties, including the third party's copyrights and other intellectual property rights, or can in any other way lead to claims from a third party.

The Project Owner shall indemnify the Research Council against any claims resulting from the Project Owner's performance of the project, including claims related to infringements of intellectual property rights.

The Research Council bears no legal or financial liability for injuries or losses ensuing from e.g. defects in or non-proficient use of equipment, methods or programmes associated with the project.

14 Force majeure

Either party shall notify the other party without undue delay should a situation of force majeure prevent that party from fulfilling its obligations under the contract.

None of the parties is to be held liable for a breach of contract if the inability to fulfil its obligations is due to force majeure.

Should force majeure entail a risk that the project cannot be performed in accordance with the contract, the parties shall meet to negotiate any contract adjustments that might be required. Should the parties fail to agree on such adjustments, the Research Council is entitled to stop payment of the allocation until the situation of force majeure is resolved.

If the situation of force majeure is expected to last, or has lasted, for more than 90 days, each of the parties may terminate the contract with one month's notice.

15 Amendments

The Research Council may introduce amendments as set out in the contract.

Each of the parties may propose amendments to the contract. Amendments to the contract require the prior written consent of the Research Council.

16 Verification, auditing and disclosure requirement

The Research Council, the Office of the Auditor General, EU bodies or a third party appointed by the Research Council are entitled at any time to verify that the funds are being applied in accordance with the contract. The Research Council may carry out on-site control.

Upon a request from the Research Council or Office of the Auditor General, the Project Owner shall produce receipts, time sheets, calculations and any other relevant documentary evidence and information requested by the Research Council and/or the Office of the Auditor General in order to carry out such verification.

The Research Council and the Office of the Auditor General may require the Project Owner to disclose all information that is necessary to verify compliance with the rules pertaining to public support.

The Research Council may refrain from entering into a contract after a conditional decision has been made if the recipient of the allocation has previously breached its obligations to the Research Council, cf. section 18. The Research Council may also refrain from entering into a contract if the project applied for has a project manager who has been deemed not to be in

compliance with ethical rules and regulations for research by The common Commission on Research Integrity or The National Commission for the Investigation of Research Misconduct.

17 Repayment

Regardless of what follows from Section 4, the Research Council may demand repayment of the disbursed allocations, in whole or in part, in case of deviations from and/or breach of contract. This includes, among other things, cases where the project has received other project funding than assumed at the time the contract was signed, or if the Research Council has disbursed funds that will constitute unlawful state aid.

18 Cancellation

18.1 The Research Council's right of cancellation

The Research Council may cancel the contract in the event of a material breach on the part of the Project Owner.

Such a material breach includes among other things situations in which:

- there are significant deviations in relation to the progress plan or other factors regulated in the contract
- the Project Owner has not fulfilled its obligations relating to reporting and archiving, including that the reporting provides an incorrect picture of the actual situation, cf. Sections 7 and 10, respectively
- the disbursed funds have not been applied in accordance with the contract
- research infrastructure has not been adequately insured and kept operational and in good working order during the contract period, cf. Section 9.1
- the Project Owner is engaged in activities which are not compatible with the current legislation, the consideration of research security or with the Research Council's objectives and guidelines
- the Project Owner is unwilling or unable to complete the project

The Research Council may furthermore cancel the contract in the event that:

- a person or undertaking outside the EEA assumes control of the Project Owner, and the terms set out under Section 9.2, final clause are met
- there is notification of a declaration of bankruptcy, or a petition for compulsory winding up or the opening of composition proceedings on the part of the Project Owner, or there is other compelling reason to believe that the Project Owner is insolvent
- a decision has been taken to close down the Project Owner's activities or there is other compelling reason to believe that grounds exist for forced dissolution of the company
- key prerequisites underlying the contractual relationship are not fulfilled. This includes, among other things, cases where the Research Council receives less

funding than expected, or there are changes in public regulations or other unforeseen circumstances arise that will have a major impact on the implementation of the project or the Research Council's ability to contribute to it, cf. Section 4.7.

18.2 Procedure for cancellation

The Project Owner is to be notified before the Research Council decides to cancel the contract.

Notification of cancellation shall be submitted in writing with specification of the reasons for cancellation.

18.3 Reimbursement claims in the event of termination

If the Research Council cancels the contract pursuant to Section 18.1, the Research Council may demand repayment of the disbursed allocations, in whole or in part, including interest on the amount from the date of the breach, in accordance with the Act relating to interest on overdue payments, etc. (LOV-1976-12-17-100).

The Project Owner is to be notified before the Research Council decides to claim reimbursement of allocations.

18.4 Transfer of rights to project results in the event of cancellation

In lieu of such reimbursement, the Research Council may demand transfer of the rights to project results. The claim for such transfer shall be submitted in writing, and the Project Owner shall surrender the rights without undue delay, and cover any costs in connection with the transfer. Upon surrender, the right of ownership will be passed from the Project Owner to the Research Council or to a relevant third party.

19 Duration and discharge of the contract

19.1 In general

The contract will enter into force from the date on which it has been signed by both parties and one copy along with signed collaboration agreements have been received by the Research Council.

The contract will be discharged without notice upon conclusion of the project and submission and approval of the final report.

Discharge of the contract does not imply cessation of contract provisions that are not, by their nature, limited to the contract period. This applies, for example, to the provisions pertaining to accounts, reports, the transfer of project results, publication, etc.

19.2 Termination of the contract by agreement

The parties may agree in writing to terminate the contract before the conclusion of the project period.

20 Choice of law/venue

This agreement is governed by and shall be interpreted in accordance with Norwegian law.

Any disputes shall be settled in the ordinary courts. Oslo District Court shall serve as the court of venue. In the event that the Project Owner is a public institution, disputes shall be submitted to the Ministry of Education and Research, which will decide how these shall be solved.
